

Daniel Morales

Front-end Developer

About me

I consider myself a **responsible** person. I always try to address **politely** and **respectfully** to anyone. I am full of **curiosity** and willingness to **learn**. I am used to working **in teams** but I can progress **individually**.

More recently, I've become fascinated by how **AI** is reshaping software development, and I've been building **structured workflows** to integrate it reliably into real projects.

Professional Experience

- 2023 - 2026
Currently

PDPaola
